TypeScript
Go (Golang)
SQL (MySQL, PostgreSQL)
Version Control (Git, GitHub)
Core Web Vitals / Technical SEO
Agile / Scrum

Languages:
• English - Fluent
• Bosnian - Native

Professional Summary

Creative and driven Software and Web Developer with a strong foundation in modern JavaScript ecosystems and a growing fluency in AI- assisted development workflows. Passionate about building fast, accessible, and SEO- optimised web experiences that score high on Core Web Vitals and deliver real business impact. Comfortable taking a product from idea to deployment - spanning UI architecture, REST API integration, and performance tuning for both humans and search engines.

Work Experience

April 2025- Present

MMS Development

Web Developer

- Delivered two live, production-grade platforms for a Serbian government ministry (<https://pomirenje.gov.rs>) and a national non-profit foundation (<https://muftyfoundation.com>) - end-to-end, from UI to backend
- Engineered RESTful APIs in Node.js powering dynamic content - news, projects, scholarships, and newsletter subscriptions - consumed by Next.js frontends
- Implemented SSR and SSG with Next.js to optimise Core Web Vitals (LCP, CLS, INP), ensuring fast load times and strong Google search rankings
- Integrated Cloudinary CDN for automated image optimisation and WebP delivery, significantly reducing media payload across all device types
- Built fully responsive, accessible (a11y) layouts with semantic HTML - meeting public-sector web standards and supporting bilingual (Cyrillic/Latin) content
- Collaborated within an Agile team using Git, Jira, and Slack - shipping features iteratively and maintaining clean version-controlled codebases

Jan 2025- May 2025

Freelance

Web Developer

- Built and delivered full-stack web applications using Next.js and Node.js, covering both frontend and backend development, including REST APIs and scalable architecture
- Developed and deployed production websites (e.g. <https://bajrovicgroup.com>, <https://nadiholz.de>) with focus on performance, SEO, and Core Web Vitals optimization
- Managed end-to-end project lifecycle - from development to deployment (Vercel), ensuring fast, reliable, and maintainable solutions
- Applied component-driven architecture, API-first approach, and AI-assisted development workflows to improve development speed and code quality

Education

University of Novi Pazar

Bachelor in Computer Science

Data Structures & Algorithms, Internet Programming, Web Design etc.

Centar NIT, Novi Pazar

IT Camp- Front-end Web Developer Certificate

(ID: ITCamp2022/11.19) in HTML5, CSS3, JavaScript, and React.js
